

UPLING

**Next Stop
MARYLAND**

UPLING

Upling is a cannabis delivery app, that is custom to the dispensary, with features catering to the consumers. We are the first app in both the Google and Apple stores on the east coast. Our multi-platform services consumers and has a full Point of Sale (POS) system for dispensaries with inventory management and a delivery driver app. We are currently adding drivers to our database where you can export and import your prices, products, and quantity.

Our mission at Upling is to enhance the customer experience. We are working to connect and power an inclusive community that benefits everyone—everywhere—by making transactions safe, simple, intelligent, and accessible with the user's needs in mind.

"Connecting A Priceless Experience"

How We Landed Here

Our relationship with the cannabis community began from listening. Stories ranged from users wanting to know the best shops in town, to elder patients not leaving home to get their CBD products during the pandemic, to others who simply had zero access due to a lack of transportation to the store. Our vision is to serve and facilitate dispensaries to have better relationships with their patients while improving inventory management and providing more jobs to the economy. We built Upling for the community.

What's Sets Us Apart

Our pursuit at Upling is to enhance the customer experience. We are working to connect and power an inclusive community that benefits everyone—everywhere—by making transactions safe, simple, intelligent, and accessible with the user's needs in mind.

What's Next

In 2022, we want to serve the entire cannabis community with our full-service app—and more. We have curated dispensaries patients never knew existed, are launching informational events, and most of all, Upling appreciation activities are coming soon to your local community. Go to your favorite app store, download the Upling app, and try for free.

Saving Our Planet

GREEN WASTE MANAGEMENT SERVICES

UPLING NEWS

As Upling prepares to launch our app we continue to build alliances in Maryland. Upling has just partnered with a state-certified Green Waste Disposal company. Within the scope of our mission, we want to encourage dispensaries to make sure they are saving the earth as a part of their business model.

Earthly Conversions (EC) is a Black-owned, Women-led green waste management company based in Maryland with over 40 years in the waste management industry and 30 years of experience in business development. Their specialization is focused on Cannabis therapeutics.
